Client Testimonials:

ESS *...delivering more from your ERP Systems*

Products	ERP	Name	
Appmapper	BPCS V6	**Mark Peters** **Financial Analyst** **Belden B.V.**	"The key benefit is that AppMapper helps when you have to do the same change for multiple codes. It's really effective if you need to change let's say more then 50 codes in the same way "
Appmapper	Infor Lx	**Justin Mulrooney** **Material Analyst** **Lear Cororpation**	"Appmapper for material planning can save hours if we have to re allocate part numbers to a different Planner code or creating 100+ part numbers from scratch in one go. The real benefit for me it is the ability to modify/add 1000s of parts in minutes not hours and at the same time with that running background working on something else."
Appmapper	BPCS V6	**Paul Bogle** **European IT Mgr** **IAC Group**	"Appmapper has saved 4 hours of manual data entry per day (7-days per week). It gives more timely information as the ERP system is updated as soon as production system data available for completed shift, and the Appmapper updates provide full ERP data validation, with detailed exception reporting"
CEA Manager	BPCS V6	**Richard Feltham** **Business Analyst** **Dentsply International**	"We find this "simple to use" CEA integrity checking tool invaluable in monitoring "non-standard" changes or additions to our common CEA configuration and implementation approach. Our shared service centre in Switzerland use it to provide new employees with training in the way CEA has been configured in our numerous European locations. In turn this enables the centralised finance team to be more self-sufficient in terms of education and support. CEA manager also provides an excellent aid in creating documentation that can be available for new system users, auditors or even "old hands" who need a refresher. As a Finance Applications Consultant life is so much easier with CEA Manager!"
CEA Manager	Infor Lx	**Kim Phisker** **Financial Analyst** **Leo Pharma**	"This is an easy tool to compare the set up in different books and Ledgers and enables quick and effective problem identification. The "CEA posting Overview" gives an great overview to BPCS and is really useful for training"
